ABOUT ME

Game Developer specializing in Unity, C#, and C++ programming, with 4 years of hands-on experience gained through freelance work and commissioned game projects. Experienced in gameplay systems development, AI behavior systems, debugging, code optimization, UI/UX implementation, and level design. Skilled in creating engaging gameplay mechanics and interactive experiences while combining technical development with creative design. Passionate about building polished, high-quality games and continuously improving player experiences.

WORK EXPERIENCE

Unity Game Developer Intern
Monstronauts Inc. Apr 2026 - Jul 2026

1. **Bug Fixing & Coding –** Investigated and fixed gameplay, UI, localization, and technical bugs through coding and debugging.
2. **UI/UX Improvements –** Improved UI layouts, visual elements, and user experience to ensure consistency and proper presentation across different devices.
3. **Localization –** Implemented and fixed localization for multiple languages, ensuring translated text was properly displayed, positioned, and formatted.
4. **Bug Testing –** Tested and reproduced reported bugs, verified fixes, and performed testing to ensure features worked as intended.
5. **Asset Integration & Optimization –** Integrated game assets and optimized their sizing and placement for better UI/UX fitting across different screen resolutions and devices.
6. **Development Documentation –** Documented development processes and code architecture to support future maintenance, improvements, and feature enhancements.

Unreal Game Developer Intern
Lamina Studios Jan 2026 - Mar 2026

1. **AI Enemy Development** – Created multiple AI enemies with unique attacks, behaviors, and interactions using Unreal Engine Blueprints, Behavior Trees, Blackboards, and related AI systems.
2. **Player Movement & Controls** – Improved player movement and controls for smoother gameplay, including interactions with items and abilities such as flashlights, dashing, sprinting, and tumbling.
3. **AI Pathfinding** – Fixed and optimized NavMesh navigation to improve AI pathfinding, exploration, and movement throughout the game environment.
4. **AI Behavior & Gameplay Testing** – Tested and adjusted AI behaviors, attacks, movement, and player interactions to improve gameplay consistency and overall experience.

EDUCATION

BS Information Technology, Major in Animation & Game Development
Far Eastern University Alabang Aug 2022 - Sep 2026

Major in Animation and Game Development, with a focus on Game Design, Unity development, code optimization, game manager systems, AI system development, programming, 3D modeling and animation, UI/UX design, and interactive game development.

SKILLS

- Debugging & Troubleshooting
- AI Systems Development
- Gameplay Programming
- UI/UX Implementation
- Code Optimization
- C++ Programming
- C# Programming
- Unity Engine

STRENGTHS

Quick Learner | Analytical Thinking | Task Prioritization | Problem-Solving

PROJECTS

Alien Space Invader 2024
- Created a 2D space shooter with enemies and classic arcade-style gameplay.

Pixel Z 2024
- Created a 2D zombie shooter with levels and

Agent Snow 2025
- Created a 3D FPS with varied bullet types and advanced enemy AI.

Hell's Kitchen Chaos 2025
- Created a 3D cooking game environment

MinaTamis 2025
- Created a 3D first-person cooking simulator featuring Filipino desserts.

CERTIFICATIONS

Cisco Networking Certified, 2024
Autodesk Certified User: Maya, 2025
12th TOPCIT Philippines Level 3, 2025
13th TOPCIT Philippines Level 4, 2026
